Pente ST (mV/s)

60 ms après J

# Adaptive CRT

- AdaptivCRT **automatically** and **dynamically optimizes** the CRT pacing configuration (i.e., AV/V-V delays) according to intrinsic rhythm conduction status and level of patients' activity every minute.

# Adaptive CRT options

Non-Adaptive BiV

Conventional BiV pacing  
with **fixed AV/VV** interval  
& VV pacing configuration

Adaptive BiV

Biventricular pacing  
with Automatic **AV/VV** optimization &  
VV pacing configuration (LV→RV, RV→LV)

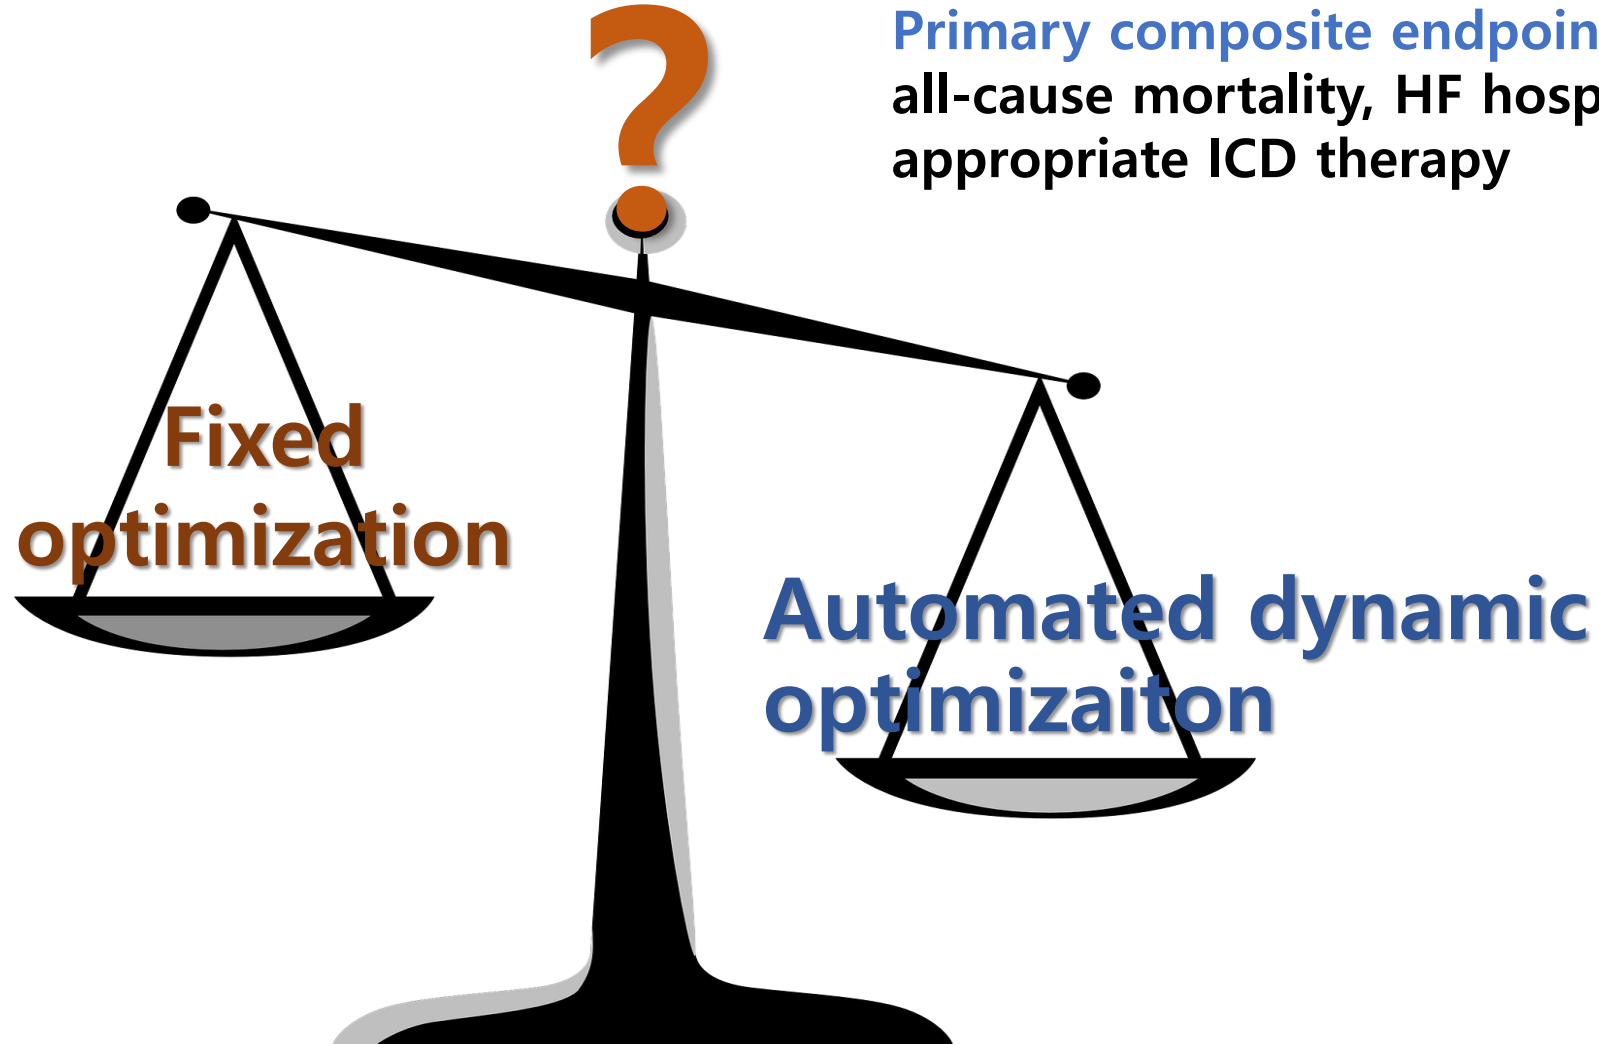

Adaptive BiV & LV

Adaptive LV only  $\leftrightarrow$  Adaptive BiV pacing

# Korean AdaptivCRT Registry Study

**Primary composite endpoint:**

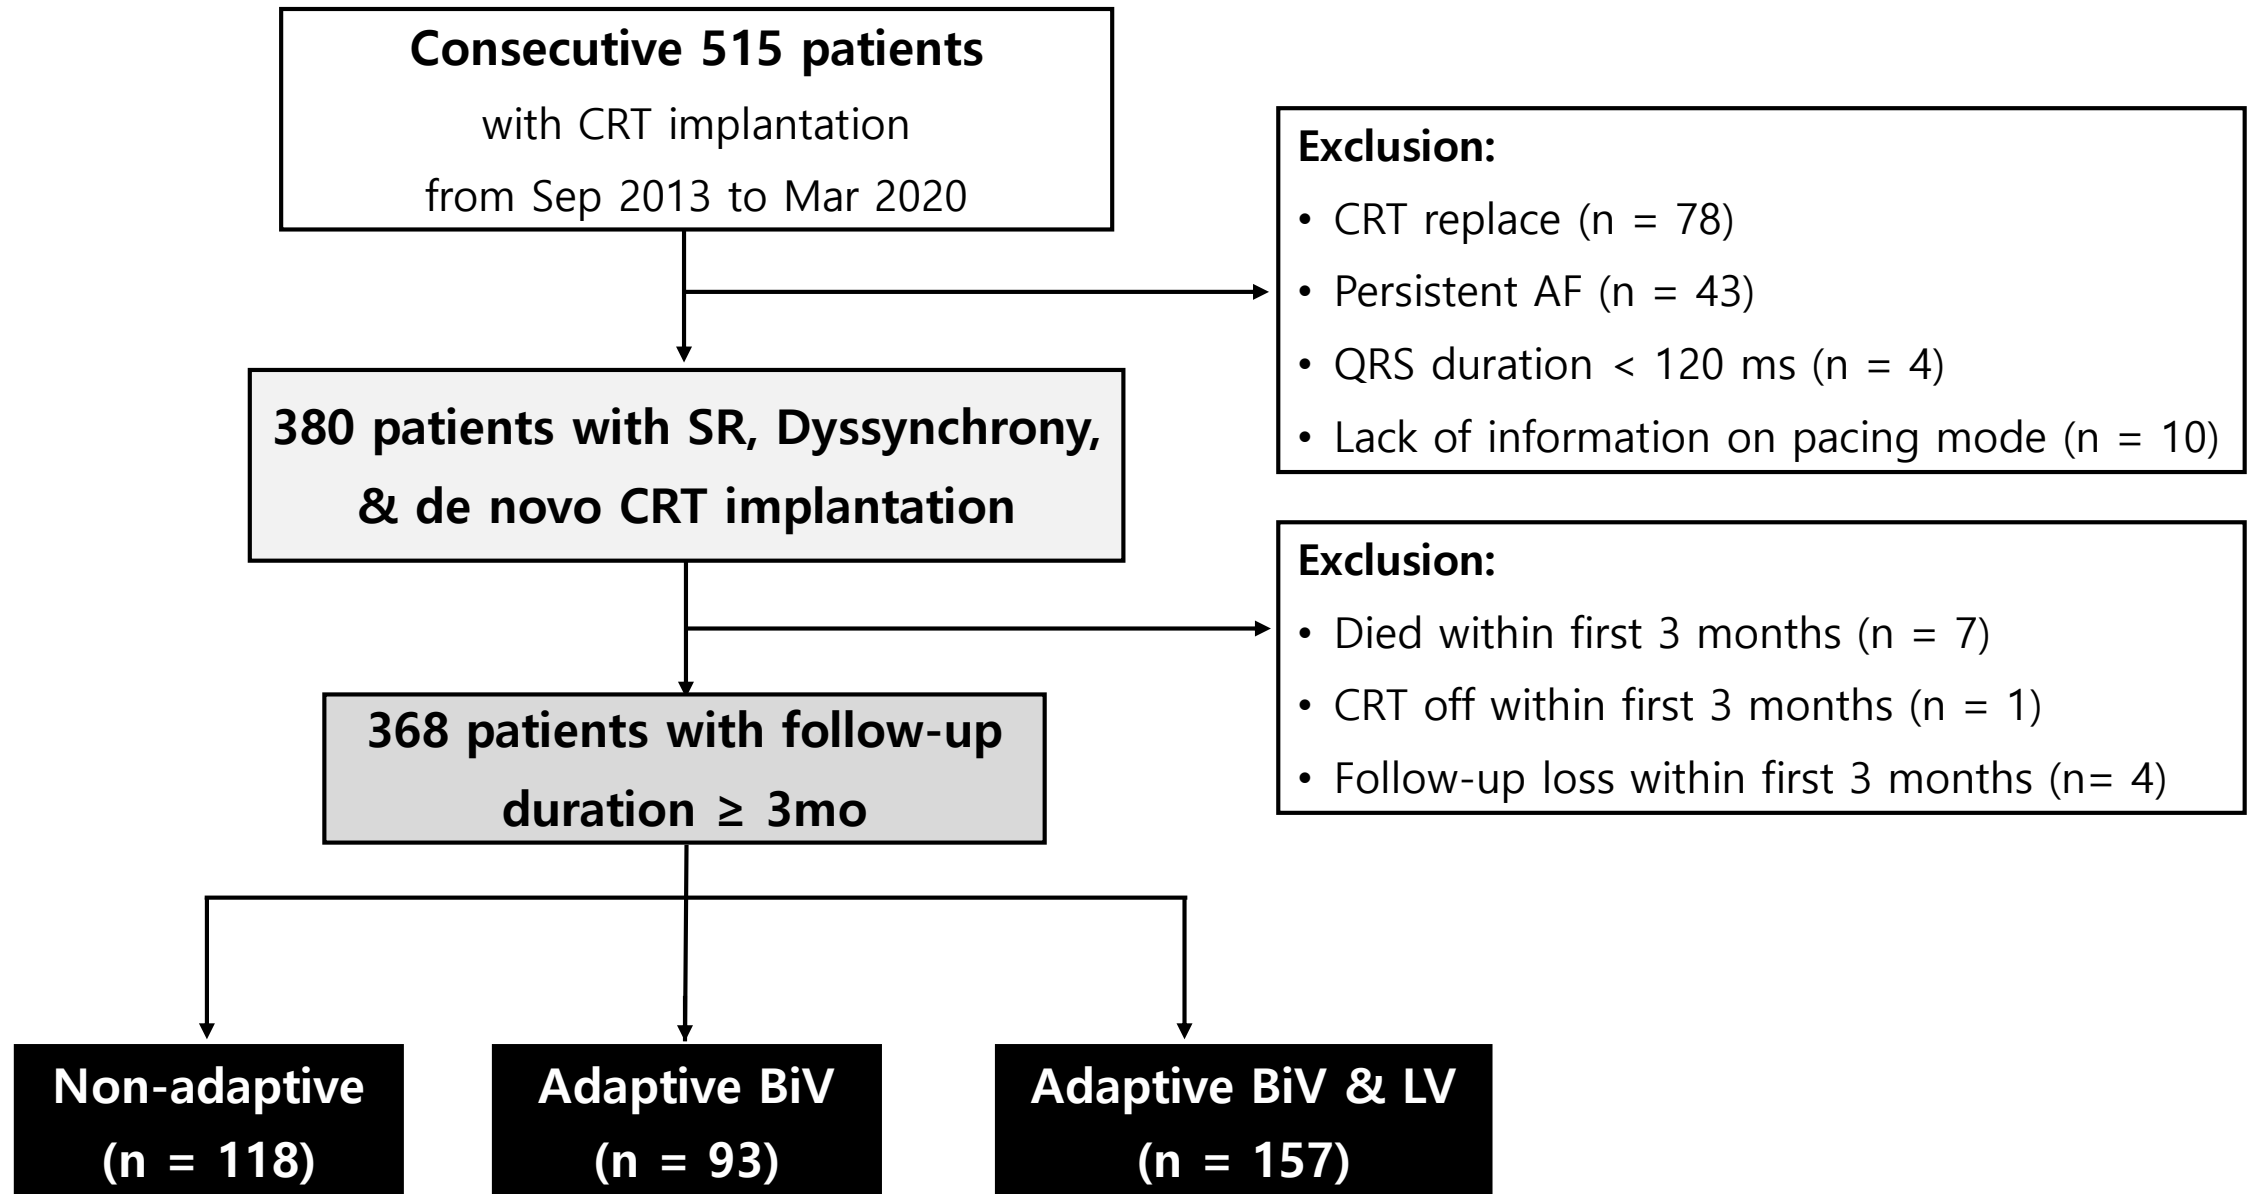

all-cause mortality, HF hospitalization, and appropriate ICD therapy

# Study design

- Retrospective, multi-centered study
- **25 tertiary centers** in Korea
- Enrollment period: September **2013** to march **2020**
- Inclusion criteria
  - Patients  $\geq 19$  years old
  - CRT-indicated patients with symptomatic HF, NYHA Fc II-IV
  - CRT implantation with **adaptive CRT algorithm**
- Exclusion criteria
  - CRT generator or lead replacement
  - QRS duration  $< 120$  ms
  - Persistent atrial fibrillation

# Baseline characteristics

# Conclusion

- Dynamic algorithm-based optimization with adaptive CRT showed better clinical outcomes compared to conventional BiV CRT in real-world clinical data.
- LV-only pacing can be a useful alternative to BiV pacing and may be considered in non-responders to conventional BiV CRT, particularly when AV conduction is intact and LBBB is present.

**경청해주셔서 감사합니다.**

# Retrospective analysis of the efficacy of **adaptive CRT** vs. conventional CRT

- **\*\* COVID-19 pandemic**
- 2021-12: 1차 데이터 수집 완료 ( ~ 20 개월)
- 2022-06: 추가 data 수집, 데이터 수집 기간 연장  
adaptive pacing mode, pacing percentage, etc
- 2022. 10 Data adjudication: (**~3yrs, 4.5yrs**)  
death (cardiac vs. non-cardiac),  
admission (HF-related or not),  
arrhythmic events (appropriate vs. inappropriate)

# Retrospective multicenter study comparing the **adaptive** and **conventional** CRT

- **2018-06: Study IRB approval**
  - 2018-11: retrospective protocol revision
  - 2019-11: CRF revision
  - **2020-01: KHRS 동계 학회**
  - 2020-03: IRB process: participating centers  
**planned to visit each center and data collection  
(6months)**
- \*\* COVID-19 pandemic**
